Project Status Overview

Project	Project Cost	Status
Community Electrical Innovation	\$10,000,000	In Progress
Grid Resiliency	TBD	Awaiting the Approval of the Substantial Amendment- 2 applications will be submitted upon approval.

Financial Overview

Project	Project Cost	Expended to Date
Community Electrical Innovation	\$10,000,000	\$0
PR1- Project Identification in Progress	\$53,000,000 (Value will change upon approval of SA)	\$0

Projects Monthly Update:

Community Electrical Innovation

Status:	In Progress
Project Description:	<p>The Community Electrical Innovation Program was created to mitigate electric power supply interruptions to entities that assist vulnerable populations in low- and moderate-income areas. Specifically, this initiative targets entities that provide daycare services, afterschool programs, homeless shelters and the elderly. The Virgin Islands Energy Office is responsible for the following:</p> <ul style="list-style-type: none">a) program guideline developmentb) vetting beneficiary applicationsc) determining beneficiary eligibilityd) assessing site feasibilitye) ensuring national objective compliancef) furnishing list of eligible applicantsg) creating an RFQ for qualified installers

	<ul style="list-style-type: none"> h) vetting installer qualifications i) establishing a pool of qualified installers j) furnishing list of qualified installers k) project implementation and management l) technical oversight (includes technology, system sizing, warranties, and capabilities) m) quality assurance and control (construction management, site inspections, etc.)
	Installed systems will be rooftop solar and battery on existing structures. No masonry construction is allowed as part of this program. Solar panels will be fastened to non-compromised roofs using a metal (usually aluminium) racking system with various fasteners (nuts & bolts). Systems will consist of wiring and conduits from the electrical panel to the solar panels and the battery storage system. The battery storage systems will be fastened to interior or exterior walls (depending on the most cost effective option).
Period of Performance:	N/A
CDBG-DR Funded Project Cost:	\$10,000,000.00
Funds Expended This Month:	\$17,545.25
Funds Expended To Date:	\$17,545.25
Progress:	10%
Monthly Update:	The application process for beneficiaries and the adaptation of VIHFA policy have been completed, as well as the final step-by-step rollout of the program, including documentation of the national objectives achieved. The AUGF was received for this program and the Beneficiary intake period officially kicked off on June 16 th . Marketing and advertisements have been made to the public. The team is currently working with Dept of Energy to improve payment request packaging.
Performance Measures:	1 application has been submitted thus far.

PR2 Grid Resiliency

Status:	Discovery
Project Description:	PR1 eligible projects
Period of Performance:	
CDBG-DR Funded Project Cost:	\$53,000,000
Funds Expended This Month:	\$0
Funds Expended To Date:	\$0.00
Progress:	
Monthly Update:	Project have been identified that WAPA can conduct under this program. A substantial amendment has been submitted and awaiting HUD approval. The team has been working with WAPA on two potential applications for submittal after SA approval.
